

01/12/23

Sparx Home Learning Platform

Dear Parents/Carers

We are delighted to let you know that we have relaunched Sparx Homework, and your child will now be completing their maths homework with Sparx Maths from Monday 04/12/23.

Below is a reminder of how you can support your child while they complete their Sparx homework.

Sparx is an exciting online platform that offers every student a personalised maths homework.

Why the switch to Sparx?

Sparx **personalises each child's homework**, creating a weekly set of questions **tailored to their level of understanding and learning pace**. The questions are designed to be achievable whilst offering the stretch that learners need to make progress. [Here](#) is a useful video explaining how Sparx is able to provide this level of support to your child.

We know that you want to support your child's maths progress, so we've put together this letter to explain how Sparx works and why it is important to make sure that maths homework is 100% completed.

How will my child log into the Sparx learning platform?

The website is <https://sparxmaths.com>. Your child's login details (username and password) is the same as their school email address which they use to log on to Google Classroom.

How can I help my child with their homework?

We appreciate that you will of course want to support your child with their home learning but please try not to help them with a question until they've had a go first! It is **important that they complete their homework independently**, and that questions are marked as correct. They can watch the support video if they need to. This way, Sparx can make sure your child continues to see homework that's at the right level for them. Further tips on how to support your child can be found [here](#).

Why does my child need to achieve 100% compulsory homework completion?

Sparx Homework is deliberately designed to **help students really get to grips with and understand the concepts and skills they are learning by ensuring they cover the essential building blocks needed to make progress in maths**. Sparx' research (sparx.co.uk/evidence) has shown that an average of 60 minutes a week of this type of personalised maths home learning leads to clear progress. It is therefore advised that students do their homework as early as possible, so they have the time to have a go themselves and seek help from their teacher if needed. Homework is not marked as complete until **all** of the compulsory questions have been answered correctly, so starting early is key to finishing before hand-in time.

You can keep track of your child's homework completion in the weekly email you will receive from Sparx.

We hope you agree that Sparx will play an exciting and important role in helping your child's understanding, success and confidence in maths to grow.

If you have any questions, please contact **your child's Maths teacher**.

Yours sincerely

Mrs Awofeso
